Author Index Volume 144 (2002)

Benney, D.J., Nonlinear instability theories in hydrodynamics 1– 5
Binz, E. and **W. Schempp,** Information technology: the Lie groups defining the filter banks of the compact disc 85–103
Brenner, M. and **Y. Xu,** A factorization method for identification of Volterra systems 105–117

Cai, D., An economic growth model with endogenous fertility: multiple growth paths, poverty trap and bifurcation 119–130
Cao, W. and **B. Guo,** A preconditioner with inexact element face solver for three dimensional p-version finite element methods 131–144
Chen, F., see **Deng, J.** 161–174

Dai, W., A Brownian model for multiclass queueing networks with finite buffers 145–160
Dai, Y., see **Yang, Y.** 349–358
Deng, J., Y. Feng and **F. Chen,** Best one-sided approximation of polynomials under $\mathbf{L}_1$ norm 161–174
Ding, H., The N-widths of spaces of holomorphic functions on bounded symmetric domains, II 175–186

Feng, Y., see **Deng, J.** 161–174
Fredebeul, Ch., D. Kornmaier and **M.W. Müller,** Multiple order double output Runge–Kutta Fehlberg formulae: strategies for efficient application 187–196

Gatteschi, L., Asymptotics and bounds for the zeros of Laguerre polynomials: a survey 7– 27
Guo, B., see **Cao, W.** 131–144

Kornmaier, D., see **Fredebeul, Ch.** 187–196

Lai, Y.-S., see **Wang, R.-H.** 277–289
Li, X., Interpolation by ridge polynomials and its application in neural networks 197–209
Li, Y., see **Luo, X.** 221–232
Lin, J., see **Yang, Y.** 349–358
Liu, X., Bivariate splines on hexagonal lattice for digital image processing 211–220
Luo, X., H. Nie, Y. Li and **Z. Luo,** Recurrence surfaces on arbitrary quadrilateral mesh 221–232
Luo, Z., see **Luo, X.** 221–232
Miura, R.M., Analysis of excitable cell models 29– 47
Miyakoda, T., On an almost free damping vibration equation using N-fractional calculus 233–240
Moodie, T.B., Gravity currents 49– 83
Müller, M.W., see **Fredebeul, Ch.** 187–196

Nie, H., see **Luo, X.** 221–232

Schempp, W., see **Binz, E.** 85–103
Shi, X. and **R. Wang,** Spline space and its B-splines on an $n+1$ direction mesh in $\mathbb{R}^n$ 241–250
Shi, X., P. Yu and **T. Wang,** G^1 continuous conditions of biquartic B-spline surfaces 251–262
Su, Y., see **Wu, W.** 325–334

Tan, J. and **S. Tang,** Composite schemes for multivariate blending rational interpolation 263–275
Tang, S., see **Tan, J.** 263–275

Wang, R., see **Shi, X.** 241–250
Wang, R.-H. and **Y.-S. Lai,** Piecewise algebraic curve 277–289
Wang, R.-H. and **Z.-Q. Xu,** Multivariate weak spline function space 291–299
Wang, T., see **Shi, X.** 251–262
Wong, R. and **H. Yang,** On an internal boundary layer problem 301–323
Wu, W. and **Y. Su,** Hopf bifurcation near a double singular point with Z_2-symmetry and X_0-breaking 325–334
Wu, W. and **Y. Xu,** Deterministic convergence of an online gradient method for neural networks 335–347

Xu, Y., see **Brenner, M.** 105–117
Xu, Y., see **Wu, W.** 335–347
Xu, Z.-Q., see **Wang, R.-H.** 291–299

Yang, H., see **Wong, R.** 301–323

PII: S0377-0427(02)00498-3

Yang, Y., J. Lin and **Y. Dai,** Largest planar graphs and largest maximal planar graphs of diameter two 349–358
Yu, P., see **Shi, X.** 251–262
Yu, P., Computation of the simplest normal forms with perturbation parameters based on Lie transform and rescaling 359–373
